

MonoCyclone EZ05

Robust and highest separation efficiency

The MonoCyclone EZ05 is the next generation development of the proven Gema® MonoCyclone design. Based on extensive airflow simulations and confirmed performance the MonoCyclone is specifically designed and constructed to provide the highest reclaim separation efficiency. The EZ05 meets the highest demands and customer expectations for all types of organic powder. In addition, the fully adjustable orientation of the cyclone inlet and outlet enable increased installation flexibility.

Customer benefits:

- Compact and space-saving design
- Increased plant layout flexibility
- Optimized cyclone body design reduces cleaning time
- Cyclone body designed to minimize powder cross contamination
- Compatible with any organic powder and Gema booth designs for easy integration

Technical Data MonoCyclone EZ05

Color change and cleaning details:

- Recovery cone lowers and swivels for easy access
- Integrated removable screen for coarse sieving
- Optional screen protection plate
- Connection for OptiFeed 4.0 bulk powder feed pump
- Integrated LED light for improved cyclone cleaning
- Multi-piece cleaning lance included

Type	Height	Width
12000	4891 mm	1350 mm
16000	5362 mm	1500 mm
20000	5752 mm	1650 mm
24000	6172 mm	1800 mm
28000	6359 mm	1900 mm
32000	6856 mm	2100 mm
